Re: Response to Request for Proposal – Product and Technology Legal Services

Dear Netflix Legal Operations team,

Thank you for inviting Dentons KMN to respond to your Request for Proposal for Product and Technology legal services. We are pleased to submit this proposal together with the completed RFP spreadsheet, which contains our individualized responses to every question in the questionnaire, our proposed team, rate card and fee options, and our attestations against the 2026 Outside Counsel Guidelines and the Outside Counsel Security Addendum & AI Guidelines.

Netflix entertains more than 300 million members in over 190 countries. Doing that lawfully, and at Netflix's pace, requires counsel who understand how product decisions actually get made: in weekly release cycles, across dozens of legal systems at once, and with a low tolerance for advice that is long on caveats and short on answers. That is the service we have built this proposal around.

Five commitments sit at the heart of our offer:

- **One team, one standard, everywhere.** A single Relationship Partner accountable for the whole engagement, with named leads from our Compliance, Legal Advisory, Corporate/M&A, Energy & PPP and Banking & Finance practices mapped to each area of the Netflix scope, and with patent prosecution and local-law input drawn from the Dentons global network in every market where Netflix operates.
- **Answers, not memos.** Practical, business-focused advice delivered in the format Netflix product, marketing and engineering teams can use directly, with a clear recommendation and a risk rating, and with acknowledgement of urgent requests within two business hours.
- **A dedicated Legal Translation & Localization Desk** staffed by bilingual English–French attorneys, extended to other languages through the Dentons network, who work inside Netflix's own translation and localization tools, follow the Netflix glossary, and confine feedback to substantive legal accuracy.
- **Transparent, predictable pricing.** One hourly rate of USD 450 for all lawyer time, fixed for three years; subscription bands for day-to-day advisory work; fixed fees quoted per scope of work; volume credits; and a portion of our fees placed at risk against agreed performance indicators.
- **Full compliance from day one** with the Netflix Outside Counsel Guidelines (Legal Tracker, LEDES, monthly billing and accruals), the Security Addendum, and the AI Guidelines, including ABA Formal Opinion 512.

We have reviewed and accept the confidentiality obligations, legal notice, terms and conditions and communication protocol set out in the RFP. We have completed our conflicts review and have

identified no conflict that would prevent us from acting for Netflix on the scope described. We will not seek advance, general or litigation waivers.

We would welcome the opportunity to present our team during the interview window of 15–25 September 2026 and to discuss how we can support Netflix's Product and Technology legal team over the long term.

Yours faithfully,

Agbor Nkongho

Companion document

The completed **Netflix RFP Response Spreadsheet** accompanies this proposal and is the primary vehicle for our questionnaire responses, as required by the RFP. This proposal expands on those responses; where the two differ, the spreadsheet governs.

1. Executive Summary

Netflix is seeking a small number of firms able to act as a genuine extension of its Product and Technology legal team: counsel who can prosecute patents across the world, keep privacy, consumer protection and marketing practices compliant in every market, paper product and platform deals quickly, respond to regulators, and translate legal documents accurately into the languages Netflix's members speak. Dentons KMN offers all of this through one accountable team, on one set of commercial terms, supported by the largest law firm network in the world.

Why Dentons KMN

What Netflix asked for	What Dentons KMN offers
Comprehensive product and technology counsel for a global entertainment and technology company	An integrated Product & Technology team combining privacy, consumer, IP, commercial and regulatory lawyers who advise technology and media platforms daily, with local-law reach through Dentons offices in the countries where Netflix operates
Legal translation across languages and jurisdictions, inside Netflix tools, to the Netflix glossary	A dedicated Legal Translation & Localization Desk of bilingual English–French attorneys, extended through the Dentons network, with a documented QA workflow, glossary governance and a "substantive-only" feedback rule
Responsive support for time-sensitive negotiations and regulatory inquiries	Named escalation path, two-business-hour acknowledgement, same-day turnaround for urgent items, follow-the-sun coverage across the Dentons network
Transparency about successes and setbacks	Written risk ratings on every piece of advice, budget alerts at 75% of estimate, quarterly business reviews with a candid "what we would do differently" section
Efficient use of tools, AI, automation and dashboards	A Netflix client dashboard with real-time spend, status and KPIs; AI used only with approved tools and in line with the Netflix AI Guidelines and ABA Opinion 512
Teams reflecting diversity and inclusion	A core team assembled to reflect diversity of background, gender and perspective, with representation data supplied in the Legal Tracker rate template where consented to and permitted
Transparent, predictable and competitive fees aligned to a long-term partnership	One hourly rate of USD 450 for all lawyer time, fixed for three years; subscription bands; fixed fees quoted per scope of work; volume credits and a 5% at-risk fee tied to KPIs

Our commitments in numbers

Commitment	Standard
Acknowledgement of any new request	Within 2 business hours
Substantive response – routine advisory question	Within 1 business day

Commitment	Standard
Substantive response – urgent (negotiation, regulator, launch-blocking)	Same business day, with interim view within 4 hours
Legal translation turnaround (standard document, up to 3,000 words)	2 business days; rush option within 24 hours
Budget and estimate accuracy	Within 10% of estimate; alert to Matter Lead at 75% of budget
Accrual accuracy	Within 10% of actuals every month
Invoice first-time acceptance rate in Legal Tracker	At least 95%
Rate stability	Single hourly rate of USD 450, fixed for 3 years from 1 January 2027
Security incident notification	Within 48 hours of discovery, as the Addendum requires; our internal target is 24 hours

2. Our Understanding of Netflix's Requirements

We have read the RFP, the 2026 Outside Counsel Guidelines and the Security Addendum & AI Guidelines closely. Our understanding of the engagement, and of what will make it succeed, is set out below.

2.1 The scope

Netflix requires comprehensive product and technology legal counsel, including:

- **Global patent prosecution** – drafting, filing and prosecuting patent applications for streaming, recommendation, encoding, delivery, games and platform technology across the jurisdictions Netflix selects, together with portfolio management.
- **Data privacy** – product-by-product privacy counselling, data protection impact assessments, cross-border transfer mechanisms, children's and sensitive-data rules, cookies and tracking technologies, and engagement with data protection authorities.
- **Consumer protection** – subscription, cancellation and auto-renewal rules, pricing and dark-pattern rules, terms of use, accessibility, games and in-app purchase rules, and platform regulation.
- **Marketing compliance** – advertising standards, promotions and sweepstakes, influencer and endorsement rules, ad-supported tier and ad-tech compliance, and claims substantiation.
- **Product contracts** – device and platform partnerships, technology licensing, SaaS and cloud procurement, developer and API terms, games publishing and distribution, and data processing terms.
- **Time-sensitive commercial negotiations and regulatory inquiries** – rapid negotiation support and coordinated responses to regulator questions, investigations and consultations.
- **Legal translation** – translation and legal review of privacy notices, terms, consumer disclosures and other product and technology documents by multilingual attorneys working within Netflix's translation and localization tools, adhering closely to the Netflix glossary and limiting feedback to substantive legal accuracy.

2.2 What we believe matters most

Netflix reality	Implication for outside counsel	How we respond
Products ship continuously to 190+ countries	Advice must arrive before the release, and must already be reconciled across jurisdictions	Multi-jurisdiction "one answer" memos coordinated by a single lead, with a jurisdiction matrix and a clear global recommendation
Netflix in-house lawyers are experienced and hands-on	Outside counsel should add capacity and specialist depth, not duplicate in-house work	Lean staffing, use of Netflix precedents and in-house resources whenever cost-effective, no "getting up to speed" charges
Culture of direct communication and high performance	Candour is expected: risks, limitations and mistakes must be raised early	Written risk ratings, "no surprises" budget rules, post-matter debriefs and a standing performance dialogue

Netflix reality	Implication for outside counsel	How we respond
Localization at scale, in many languages, in Netflix tools	Translation must be legally accurate, consistent with the glossary and free of stylistic churn	Attorney-translators trained on the Netflix glossary, working in Netflix tools, with a two-step legal QA and a substantive-only feedback rule
Disciplined legal operations (Legal Tracker, LEDES, accruals)	Billing hygiene is part of the service, not an afterthought	A named billing manager, monthly LEDES invoicing, accruals within 10%, first-time acceptance target of 95%

2.3 Assumptions

In the absence of matter-level volumes in the RFP, our fee options in Section 11 assume an initial engagement of twelve months from award, renewable, with work allocated by Netflix Matter Leads on a matter-by-matter basis. Volumes stated in the fee tables are illustrative and do not constitute a minimum commitment by Netflix. All pricing is in US dollars unless a Netflix billing entity or the place of performance requires another currency, as the Guidelines contemplate.

3. About Dentons KMN

Dentons KMN (Kouengoua Minou Nkongho), Attorneys at Law, is a full-service law firm based in Douala, Cameroon, and a member of Dentons, the world's largest law firm by lawyer headcount, with offices in more than 80 countries. Our lawyers practise in English and French, in a jurisdiction that combines common-law and civil-law traditions within the OHADA and CEMAC frameworks, which makes the firm a natural bridge between anglophone and francophone legal systems. Dentons is polycentric by design: there is no single headquarters and no dominant national culture, which means Netflix receives locally qualified advice in each market delivered through a single, globally coordinated team.

Dentons KMN is organised around five practice groups: Corporate/M&A, Energy & PPP, Banking & Finance, Compliance, and Legal Advisory. For Netflix, each area of the RFP scope is mapped to the practice group best placed to lead it, with global patent prosecution and additional local-law capacity drawn from the Dentons network.

3.1 Relevant capabilities

Dentons KMN practice group	Lead role in the Netflix scope
Compliance	Data privacy and data protection, consumer protection, marketing and advertising compliance, AI and platform regulation, compliance programmes and regulator engagement
Legal Advisory	Day-to-day product and technology advisory, terms of use and policies, the Legal Translation & Localization Desk (English–French and, through the network, other languages), and coordination of IP matters
Corporate/M&A	Product contracts, platform and device partnerships, technology licensing, SaaS and cloud procurement, and time-sensitive commercial negotiations
Energy & PPP	Regulatory inquiries, public-sector and government engagement, consultations and coordinated responses to authorities across jurisdictions
Banking & Finance	Payments, subscription billing, consumer-credit and financial-regulatory aspects of product flows, and fintech partnerships
Dentons global network	Global patent prosecution through Dentons' Intellectual Property practice, and local-law input in every market where Netflix operates, coordinated by Dentons KMN under one budget and one point of contact

3.2 Sector experience

Our lawyers advise streaming, gaming, digital media, consumer technology and platform businesses on the issues at the centre of this RFP: how to launch a product feature lawfully in many countries at once, how to design subscription and cancellation flows that satisfy consumer regulators, how to build a defensible privacy programme for personalization, and how to protect and license

technology. We are accustomed to working with in-house teams that expect to be treated as sophisticated peers, and to the pace at which technology companies operate.

Representative experience

Specific matter descriptions are available on request, subject to client confidentiality. In line with Section III.B of the Netflix Outside Counsel Guidelines, we do not publicise client engagements without written authorization, and we would apply the same rule to Netflix.

[Insert 4–6 anonymised representative matters here: e.g. multi-country subscription flow review for a streaming service; global privacy programme for a personalization engine; patent portfolio for video encoding technology; regulator inquiry response on children's data; localization review of terms and privacy notices in 20+ languages.]

3.3 Awards, rankings and accreditations

[Insert current directory rankings (e.g. Chambers, Legal 500, IFLR1000) for Dentons KMN and the relevant Dentons offices, together with any ISO 27001 or equivalent information security certifications held by the firm. In progress.]

4. Proposed Team and Staffing Model

Netflix asks for staffing that is lean, stable and diverse. Our model gives Netflix a single accountable Relationship Partner, five practice leads, and a small bench of associates and attorney-translators who will work on Netflix matters consistently so that knowledge stays with the team. Any change to the core team will be discussed with, and approved by, the Netflix Matter Lead before it happens.

4.1 Core team

Role	Name	Responsibilities	Languages
Relationship Partner	Agbor Nkongho	Single point of accountability; scoping, staffing, budgets, quality, quarterly business reviews; escalation for any concern	English, French
Compliance Lead – privacy, consumer protection and marketing compliance	[Compliance Lead name]	Product privacy counselling, DPIAs, transfers, consumer and subscription rules, advertising and promotions, regulator engagement, incident response	English, French
Legal Advisory Lead – product advisory and Translation & Localization Desk	[Legal Advisory Lead name]	Day-to-day product and technology advice, terms of use and policies, attorney-translator pool, glossary governance, QA workflow, work in Netflix localization tools	English, French
Corporate/M&A Lead – product contracts and negotiations	[Corporate/M&A Lead name]	Product, platform, device, licensing and procurement contracts; playbooks; time-sensitive negotiations	English, French
Energy & PPP Lead – regulatory inquiries	[Energy & PPP Lead name]	Coordinated responses to regulators and public authorities, consultations, government engagement	English, French
Banking & Finance Lead – payments and subscription billing	[Banking & Finance Lead name]	Payments, billing and consumer-credit aspects of product flows, fintech partnerships, financial-regulatory questions	English, French
Dentons global IP & Patents Lead – global patent prosecution	[Dentons global IP & Patents Lead name and office]	Patent drafting and prosecution strategy, portfolio management, foreign associate coordination, delivered through Dentons' global IP practice and coordinated by Dentons KMN	English
Client Service & Billing Manager	Christian Ekwe	Legal Tracker administration, LEDES invoicing, accruals, rate submissions, rejection handling, dashboard reporting	English, French
Security Point of Contact	[Security Point of Contact name]	Security Addendum compliance, incident notification to vendorsecurity@netflix.com, security inquiries	English, French

Full biographies, bar admissions, years of qualification, timekeeper IDs and proposed allocations are provided in the "Proposed Team" tab of the RFP spreadsheet.

4.2 Staffing principles

- **Right level, every task.** Partners set strategy and sign off; senior associates deliver; paralegals handle work suited to paralegals. Attorneys will not bill for work generally completed by paralegals, and administrative work is never charged.
- **No first- or second-year associates** and no summer associates on Netflix matters without the prior approval of the Netflix Matter Lead, in accordance with Section I.F of the Guidelines.
- **One attendee unless approved.** Only one attorney attends meetings, negotiations and hearings unless the Netflix Matter Lead approves more in advance.
- **Stability.** Core team members are allocated to Netflix on a standing basis. Where a change is unavoidable, we propose the replacement to the Matter Lead in advance, and Netflix is never charged for the transition or for "getting up to speed".
- **Leverage Netflix resources.** We will use Netflix templates, playbooks, precedents and in-house specialists wherever it is reasonable and cost-effective to do so.
- **Global reach without global cost.** Patent prosecution and local-law input from other Dentons offices are coordinated by the core team and are scoped, budgeted and approved in advance, so that Netflix has one point of contact, one budget and one docket.

4.3 Coverage, escalation and continuity

Situation	What happens
New request from a Netflix Matter Lead	Acknowledged within 2 business hours by the relevant practice lead or the Relationship Partner; scope, timing and estimate confirmed the same day for anything above 5 hours of work
Urgent request outside local business hours	Routed to the Dentons follow-the-sun duty roster via a dedicated Netflix mailbox; the Relationship Partner is reachable by phone at all times
Lead unavailable (leave, conflict, illness)	A named deputy for each lead is disclosed in the spreadsheet; the deputy is already familiar with Netflix's matters, so there is no ramp-up cost
Concern about service, quality or cost	Raise it with the Relationship Partner, or directly with the Office Managing Partner; response within one business day and a written remediation plan within five

5. Our Approach to Each Area of Scope

Across every area, our approach follows the same three rules: start from the product decision Netflix needs to make; give a recommendation and a risk rating, not a menu of options; and reconcile jurisdictions into a single global answer wherever possible.

5.1 Global patent prosecution

What we do. Invention harvesting sessions with engineering teams; patentability and prior-art assessment; drafting of specifications and claims for software, streaming, encoding, recommendation, delivery, games and device technologies; filing and prosecution before the USPTO, EPO and other offices via Dentons offices and a managed network of long-standing foreign associates; oppositions and post-grant proceedings; portfolio reviews and annuity management.

How we deliver. Patent drafting and prosecution is delivered through Dentons' global Intellectual Property practice and coordinated for Netflix by Dentons KMN, so that Netflix has one point of contact, one budget and one docket. A single prosecution lead maintains Netflix's docket with automated deadline control and a monthly portfolio report. Foreign associate fees are engaged only with prior approval, paid by us and passed through at cost with the associate's invoice attached, as the Guidelines require. Where Netflix prefers, each stage (drafting, filing, office action response, grant) is quoted as a fixed fee based on its scope so prosecution spend is fully predictable.

5.2 Data privacy

What we do. Privacy-by-design counselling for new features and experiments; data protection impact assessments; lawful-basis and consent architecture for personalization, advertising and measurement; children's and age-assurance rules; cookies and tracking technologies; cross-border transfers; data processing agreements; data subject rights processes; incident response; and engagement with data protection authorities.

How we deliver. A "global privacy answer" format: a one-page recommendation supported by a jurisdiction matrix that flags only where local law diverges from the global position. We maintain a live regulatory tracker for the privacy regimes relevant to Netflix and brief the Netflix privacy team monthly on changes that require product action.

5.3 Consumer protection

What we do. Subscription, free trial, auto-renewal, price-change and cancellation flows; terms of use and end-user licence terms; unfair terms and transparency rules; dark-pattern and choice-architecture enforcement trends; games, in-app purchase and loot-box rules; accessibility obligations; platform and digital-services regulation; and responses to consumer regulators and ombudsmen.

How we deliver. Screen-level reviews of user flows with annotated screenshots, so product managers and designers receive advice they can implement directly. Findings are rated red, amber or green, and only red items are launch-blocking.

5.4 Marketing compliance

What we do. Advertising standards and claims substantiation; promotions, sweepstakes and contests; influencer, endorsement and disclosure rules; email, push and SMS marketing rules; ad-

supported tier and ad-tech compliance; brand partnerships and co-marketing; and pre-clearance of campaigns.

How we deliver. A marketing playbook tailored to Netflix, updated quarterly, that lets Netflix marketers self-serve on routine questions and reserve outside counsel time for the genuinely novel. Campaign pre-clearance is offered at a fixed fee per campaign.

5.5 Product contracts and time-sensitive negotiations

What we do. Device, platform and distribution partnerships; technology and content-delivery licensing; SaaS, cloud and infrastructure procurement; developer, API and games publishing terms; data processing and security schedules; and negotiation support against counterparties of any size.

How we deliver. Netflix-approved playbooks and fallback positions so that first drafts and mark-ups arrive within 48 hours; capped fees per contract type; and a negotiation lead who stays on the call from kick-off to signature. For genuinely time-sensitive negotiations we commit to same-day turnaround of counterparty mark-ups.

5.6 Regulatory inquiries

What we do. Coordinated responses to information requests, investigations, audits and consultations from privacy, consumer, telecommunications, media and competition regulators across jurisdictions; preparation of Netflix witnesses; and strategic engagement with regulators on forthcoming rules.

How we deliver. A single response coordinator, a consistent narrative across every jurisdiction, and a war-room protocol for deadlines under ten business days. Where a matter becomes contentious, we bill by the litigation phase task codes (L100–L500) exactly as the Guidelines require.

5.7 Legal translation and localization

Netflix has set specific expectations for translation work, and we have designed a dedicated desk around them. Dentons KMN practises in a bilingual jurisdiction: our lawyers draft, negotiate and advise in both English and French every day, which gives Netflix a translation desk whose members are practising attorneys in both languages rather than translators with legal training. Other languages are covered by attorney-translators in Dentons offices across the network, working under the same workflow and QA rules.

Netflix expectation	Dentons KMN practice
Multilingual attorneys	Translation is performed and reviewed only by qualified lawyers who are native or near-native speakers of the target language and trained in the relevant legal system; English–French is handled in Douala, other languages through Dentons offices in the network
Work directly within Netflix's internal translation and localization tools	Our attorney-translators are onboarded to Netflix's tools, follow Netflix's workflow states and never take Netflix content outside the Netflix environment

Netflix expectation	Dentons KMN practice
Adhere closely to the Netflix glossary	The glossary is loaded into our terminology checks; every deliverable passes an automated glossary-conformance check before legal QA; proposed glossary additions are submitted to Netflix for approval rather than applied unilaterally
Feedback focused on substantive legal accuracy, not style or preference	A written "substantive-only" rule: feedback is limited to legal meaning, enforceability, mandatory local-law wording and regulatory terminology; stylistic comments are not made unless Netflix asks
Consistency across languages and jurisdictions	A source-language legal lead aligns meaning across all target languages before individual translations begin, so local versions do not drift
Predictable turnaround and cost	A fixed fee quoted per translation batch based on its scope (word count, document type, languages), agreed before work starts; standard turnaround of 2 business days for documents up to 3,000 words, and a rush option

Quality workflow. (1) Intake and glossary check; (2) attorney translation or legal review of an existing localization; (3) independent second-attorney legal QA; (4) automated consistency and glossary check; (5) delivery in Netflix's tool with a short substantive-issues note. We measure a substantive error rate on every batch and report it in the quarterly dashboard.

Routine translation of day-to-day communications is not charged, consistent with Section I.F of the Guidelines. Our translation fees apply only to legal documents Netflix asks us to translate or review.

6. Communication and Responsiveness

Netflix will assess responsiveness, clarity, objectivity and the ability to turn complex legal issues into practical terms that apply directly to Netflix's services and products. Our service standards are set out below and will be reported against every quarter.

Standard	Commitment
Acknowledgement	Every new request acknowledged within 2 business hours, naming the responsible lawyer and the expected delivery time
Routine advisory response	Within 1 business day
Urgent response	Interim view within 4 hours; full response the same business day
Contract first drafts and mark-ups	Within 48 hours; same day for time-sensitive negotiations
Format	Lead with the answer. One-page advice notes with a recommendation, a red/amber/green risk rating and the "so what" for the product; detail in an annex only where needed
Language	Plain English, no jargon, no unnecessary caveats; local-law nuance expressed as a practical instruction, not a treatise
Channels	Netflix's preferred channels, including a shared Netflix–Dentons workspace, video calls and a dedicated Netflix mailbox; no public comment on any matter, ever, without written authorization
Objectivity	Where the law is unsettled we say so, give our best judgement of likely outcomes, and distinguish clearly between legal risk and business risk

We also propose a fortnightly 30-minute stand-up with the Netflix Matter Leads to review open items, upcoming launches and priorities, so that work is sequenced around Netflix's roadmap rather than ours.

7. Transparency and Partnership

Netflix has asked for a partner who communicates openly about successes and setbacks, shares learnings, is direct about risks and limitations, and maintains an honest dialogue on performance, strategy and improvement. These are the mechanisms we will use.

- **Written risk ratings.** Every piece of advice carries an explicit risk rating and confidence level so that Netflix can see not only what we recommend but how sure we are.
- **"No surprises" budgeting.** Every matter above 5 hours receives an estimate in writing; we alert the Matter Lead at 75% of budget and never exceed an estimate without prior approval.
- **Post-matter debriefs.** For every significant negotiation, regulatory response or launch review we send a short debrief: what went well, what did not, and what we would do differently.
- **Learnings log.** A shared log of regulatory developments, enforcement trends and lessons from Netflix matters, reviewed at each quarterly business review.

- **Quarterly business reviews.** A structured review of KPIs, spend against budget, staffing, upcoming risks and a candid self-assessment by the Relationship Partner, with an invitation for Netflix feedback on the team and on individual lawyers.
- **Own our mistakes.** If we make an error, we tell the Matter Lead immediately, correct it at our cost and record it in the learnings log.
- **Conflicts and independence.** Existing or prospective engagements that could create an actual or potential conflict will be disclosed to Netflix promptly; we will not seek advance, general or litigation waivers.

8. Technical Quality and Strategic Counsel

Netflix will evaluate our experience and track record in product and technology law, the consistency of our legal arguments, and our capacity for strategic, proactive counsel.

8.1 Consistency

- A Netflix knowledge bank of positions taken, precedents, playbooks and jurisdiction matrices, maintained by the Relationship Partner, so that advice is consistent across lawyers, offices and time.
- Partner sign-off on all advice and all contract positions before delivery; two-attorney QA on all translations.
- A single global answer as the default, with local divergence flagged explicitly rather than delivered as separate country memos.

8.2 Proactive counsel

- Monthly horizon-scanning briefings covering privacy, consumer, advertising, platform, games and IP developments in Netflix's key markets, each item tagged with the product action it may require and a proposed timeline.
- An annual "product legal health check" reviewing subscription flows, privacy notices, marketing practices and key contract templates against the year's regulatory changes.
- Early-warning notes on enforcement trends, drawn from our work across the technology and media sectors, so that Netflix can adjust before a regulator asks.

8.3 Quality assurance

Every deliverable is reviewed by a second lawyer before it leaves the firm. Complex or novel questions are reviewed by a practice lead. We track quality through the KPI scorecard in Section 15, including a substantive error rate on translations and Netflix satisfaction scores collected at each quarterly review.

9. Tools and Technology

Netflix values the efficient use of case management systems, artificial intelligence, automation and dashboards that enable real-time tracking, generate clear performance indicators and drive productivity. Our technology stack for Netflix is described below.

Capability	What Netflix gets
Matter and workflow management	Every Netflix request logged as a matter with owner, status, deadline, budget and estimate; Netflix Matter Leads can see status in real time
Netflix client dashboard	Live view of open matters, work in progress, spend against budget by matter and practice area, accrual position, KPI performance and translation throughput; refreshed daily and reviewed at each quarterly business review

Capability	What Netflix gets
eBilling integration	LEDES 1998B (and 98BI for international billing) generated directly from our practice management system with Netflix task codes and a PDF backup on our letterhead; a pre-submission compliance check screens every invoice against the Guidelines before upload to Legal Tracker
Contract automation	Netflix-approved templates and playbooks in our document automation platform, producing first drafts within hours and reducing review time
Translation technology	Terminology management and automated glossary-conformance checks; work performed inside Netflix's localization tools rather than exported
Regulatory tracking	A monitored tracker of legislative and enforcement developments across Netflix's markets, feeding the monthly briefing
Secure collaboration	An encrypted client workspace for document exchange, with access limited to the Netflix team on a least-privilege basis and full audit logging
Generative AI	Approved, enterprise-grade tools with contractual guarantees that Netflix data is not used to train models; used only where they make the work faster or better, and always subject to lawyer review

9.1 Our AI commitments to Netflix

- We will consult the Netflix engagement owner before using generative AI tools on Netflix matters and will use only tools approved by the supervising Netflix attorney.
- We will not use Netflix confidential information in any self-learning AI system without Netflix's advance informed consent, requested and given in writing (email is acceptable), consistent with ABA Formal Opinion 512 and Netflix policy.
- Lawyers bill only actual time spent; efficiency gains from AI are passed to Netflix and never charged for. We will not charge Netflix any fees or costs for AI tools or services that have not been approved beforehand by the supervising Netflix attorney.
- Every AI-assisted output is verified by a responsible lawyer before it is relied on or delivered. We comply with applicable law, professional guidance (including the State Bar of California's Practical Guidance where relevant) and ABA Opinion 512, and we monitor developments in AI guidance and update our practices accordingly.

10. Team Composition, Diversity and Inclusion

Netflix prioritizes teams that reflect diversity and inclusion across backgrounds, genders and perspectives, and asks its legal vendors to demonstrate the same commitment. We share those values and have assembled the Netflix core team accordingly.

- **Team composition.** The proposed core team has been assembled to reflect diversity of gender, background, nationality, language and career path, and to give Netflix a range of perspectives at both partner and associate level. [Insert current composition statistics for the proposed team, e.g. percentage of women and of lawyers from under-represented backgrounds among partners and among the team overall. In progress.]
- **Representation data.** We will include timekeeper representation data in the Legal Tracker rate upload template, where individuals have consented and applicable law permits, as Section II.B of the Guidelines requests.
- **Meaningful roles.** Diverse team members will lead substantive work and client relationships, not only support them; we will report on origination and lead roles by demographic at each quarterly business review.
- **Firm-wide commitments.** [Insert Dentons KMN and Dentons diversity and inclusion policies, targets, affinity networks, mentoring and sponsorship programmes, and any external commitments or certifications. In progress.]
- **Supplier code of conduct.** We have reviewed and will abide by the Netflix supplier code of conduct, and we expect the same of any third party we engage on Netflix's behalf.

11. Pricing and Fee Proposal

Netflix is looking for transparent, predictable and competitive fee models that align with a long-term partnership and performance-based goals. Dentons KMN does not operate a tiered rate card. Our proposal combines a single hourly rate for all lawyer time, subscription bands for day-to-day advisory work, and fixed fees quoted per scope of work, with volume credits and a portion of our fees at risk against performance. Full detail, including the calculators, is in the "Hourly Rate" and "Fee Model" tabs of the RFP spreadsheet.

Pricing principles

Simple. One hourly rate of USD 450 for every lawyer, from partner to associate. Netflix pays the same whether a partner or an associate does the work, so we have every incentive to staff each task at the right level.

Predictable. The rate is fixed for three years from 1 January 2027, with no step or promotion increases, and any later adjustment is discussed with the Netflix Matter Lead within Netflix's annual rate submission window only.

Transparent. Estimates in writing for every matter above 5 hours; alerts at 75% of budget; fixed fees agreed in writing before work starts; no charges for any item listed as prohibited in the Guidelines.

Performance-based. Volume credits on annual fees and 5% of quarterly fees held at risk against the KPI scorecard in Section 15.

11.1 Hourly rate

Timekeeper	Rate (USD/hr)	Effective	Fixed until
All lawyer time (partners, counsel and associates)	450	1 January 2027	31 December 2029
Paralegal and administrative support	Not billed separately	—	—
Dentons offices outside Dentons KMN (e.g. patent prosecution, local-law input)	Agreed with the Netflix Matter Lead and submitted to Legal Tracker before any work is billed	1 January 2027	31 December 2029

Time is recorded in one-tenth-hour increments for actual time spent only. Associates in their first or second year of practice will not be staffed on Netflix matters without prior approval. For litigation matters, the rate submitted to a matter in Legal Tracker remains in effect for the life of the matter and for a minimum of three years, as the Guidelines require.

11.2 Fee models

Model	Best suited to	Structure
A. Advisory subscription	Day-to-day privacy, consumer, marketing, product and translation questions	A fixed monthly fee for an agreed band of hours. Bands are sized to the client's scale, industry and expected volume; for Netflix we propose three indicative bands (40, 80 and 150 hours per month) priced at the hourly rate less a subscription discount that increases with the band. Unused hours roll over one quarter; overage is billed at the hourly rate less 10%; the band is reviewed quarterly with the Matter Lead.
B. Fixed fee per scope of work	Any defined deliverable: a translation batch, a contract or template, a patent stage, a campaign review, a regulatory response, a user-flow review	At kick-off we quote a fixed fee based on the scope of work and the sector, agreed in writing before work starts. We absorb time above the fee; a re-scope is agreed only if the scope changes materially. Official fees and approved third-party costs are passed through at cost.
C. Hourly	Work that cannot be scoped in advance, including urgent negotiations and regulator deadlines	USD 450 per hour with a written estimate, a 75% budget alert and no estimate exceeded without prior approval.

11.3 Volume credits and performance-based fees

Mechanism	Terms
Volume credit	An additional credit on total annual fees: 2% above USD 500,000; 4% above USD 1,000,000; 6% above USD 1,500,000; applied as a credit note in the first quarter of the following year
At-risk fee	5% of each quarter's fees is held back and released only if at least four of the six KPIs in Section 15 are met; any unreleased portion is credited to Netflix
Rate freeze	USD 450 per hour fixed for three years from 1 January 2027; litigation-matter rates fixed for the life of the matter (minimum three years) in accordance with the Guidelines
No-charge items	Onboarding, transition, conflict checks, bill preparation, internal staff changes, routine translation of communications, non-working travel time, research database charges, overhead and all other items listed in Section I.F of the Guidelines
Expenses	At cost, in line with the Netflix travel policy (coach air travel, reasonable hotels, no town cars), with receipts for every item above USD 75 and no charge for local meals or remote-working expenses

11.4 Illustrative annual budget

The spreadsheet contains a budget calculator that lets Netflix model annual spend by workstream using its own volume assumptions, under the subscription, fixed-fee or hourly model. The illustrative figures in it are for modelling only and do not constitute a minimum commitment by Netflix. We would be pleased to refine them with Netflix during price negotiations in October.

12. Compliance with the Netflix Outside Counsel Guidelines

We have reviewed the Netflix Outside Counsel Guidelines (updated January 2026) and confirm that we will comply with them in full. The table below records our commitment against each requirement; the "Billing Compliance" tab of the spreadsheet contains the same attestations in questionnaire form.

Guideline	Dentons KMN commitment
I.A Matter alignment	One invoice per matter; no aggregation across matters; eBilling matter number verified before every submission
I.B Timing and accruals	Monthly invoices via Legal Tracker covering one month of fees and expenses; nothing submitted later than 60 days after the work; accruals submitted monthly per the Legal Tracker accrual calendar, within 10% of actuals, calculated at approved rates, including "on hold" invoices
I.B Payment terms	Net 45 from the invoice date accepted
I.C Invoice formats	LEDES format (98B; 98BI for international billing) plus PDF backup on our letterhead showing the Netflix entity and address on the billing matter; tax documents uploaded with international invoices; billing currency determined by billing entity and place of performance
I.D Vendors and pass-through expenses	No third party engaged without prior approval of the supervising Netflix attorney; vendors engaged and paid by us and passed through at cost with the vendor invoice attached or referenced
I.E Time entries and task codes	Actual time in 0.1-hour increments; entries identify the parties (including Netflix participants) and the action taken; litigation matters billed by day with per-task times in parentheses and only the L100–L500 phase codes; separate entries per motion type
I.F Prohibited fees and expenses	None of the listed items will be billed, including administrative work, attorney time on paralegal tasks, getting up to speed, bill preparation, conflict checks, routine translation of communications, non-working travel, research databases, overhead, first- and second-year associates and summer associates without approval, multiple attendees without approval, unauthorized third-party fees, after-hours costs, travel agency fees and remote-working expenses
I.G Travel	Coach air travel, reasonable hotels, no local meals, reasonable ground transport, receipts above USD 75; anti-corruption compliance on every expense
I.H Rejection handling	Rejected invoices corrected and resubmitted within 15 calendar days using the original bill number with an "R" suffix, with every stated reason fully addressed
I.I AI and data security	Netflix engagement owner consulted before AI use; only approved tools; actual time billed; no AI-related fees or costs without prior approval; Security Addendum and AI Guidelines followed
II.A Staffing	Lean, stable and diverse staffing; changes approved by the Netflix Matter Lead; Netflix in-house and business resources leveraged where cost-effective

Guideline	Dentons KMN commitment
II.B Timekeeper rates	All rates submitted to Legal Tracker for approval before invoicing, with timekeeper detail, negotiated discounts and representation data (where consented and permitted); effective dates aligned to our fiscal year (1 January); rate requests only in the annual window; no step increases for partners, principals or of counsel; litigation rates fixed for the life of the matter (minimum three years)
III.A Other clients	Prompt disclosure of any actual or potential conflict; no request for advance, general or litigation waivers; waiver requests, if any, submitted for case-by-case consideration by Netflix litigation
III.B Public comment	No public comment on our representation of Netflix or any matter, including press, awards, websites or pitch materials, without written authorization from the responsible Netflix counsel

13. Information Security and AI Compliance

We accept the Netflix Outside Counsel Security Addendum & AI Guidelines as incorporated into our engagement terms, including the 30-day notice mechanism for material changes. Our security point of contact for Netflix is set out in Appendix B, and we will keep that information current.

13.1 Comprehensive Information Security Program

Dentons KMN maintains a documented Comprehensive Information Security Program consisting of administrative, physical and technical controls proportionate to the sensitivity of the data we hold.

[Insert certifications held, e.g. ISO/IEC 27001, and the date of the most recent independent audit or penetration test. In progress.] Appendix A maps each control listed in Section 2(a)–(s) of the Addendum to our current practice and confirms compliance.

13.2 Key commitments

Addendum requirement	Dentons KMN commitment
Section 3 – Point of contact	[Security Point of Contact name] is our named security point of contact; we will notify Netflix of any change
Section 4 – System access	Netflix systems accessed only for the engaged services and only for as long as necessary; all Netflix security protections observed; full responsibility for credentials issued to us; Netflix may terminate access at any time
Section 5 – Cooperation with inquiries	Reasonable security inquiries answered, with documentation and metrics demonstrating the operation of our program
Section 6 – Security incidents	Documented incident response plan; detailed written notice to vendorsecurity@netflix.com and legalops-ebilling@netflix.com promptly and in no event more than 48 hours after discovery (internal target 24 hours), covering incidents at the firm, affiliates and sub-processors; containment and recurrence-prevention plans at our cost; documentation supplied to Netflix, its insurers and counsel on request; consultation with Netflix on the content, form and timing of any legally required notice
AI Guidelines	Compliance with applicable law, professional guidance (including California State Bar guidance where relevant) and ABA Formal Opinion 512; advance written informed consent before any Netflix confidential information is used in a self-learning AI system; ongoing monitoring of AI guidance developments

14. Conflicts, Independence and Confidentiality

- **Conflicts.** Our conflicts review against the scope of this RFP has identified no conflict that would prevent Dentons KMN from acting for Netflix. We will run a check on every new matter, disclose any actual or potential conflict promptly, and will not seek advance, general or litigation waivers.
- **Confidentiality of this RFP.** We have restricted access to the RFP materials to personnel who need them to prepare this response, who have been informed of the confidentiality

requirements and who are bound to prevent unauthorized disclosure. We will return or destroy all RFP materials promptly on request.

- **Confidentiality of Netflix information.** Netflix information is held in a segregated matter environment, on a least-privilege basis, encrypted in transit and at rest, and is never placed in unapproved tools or on unencrypted removable media.
- **Netflix intellectual property.** We acknowledge that the RFP grants no right to use the Netflix name, logo or any Netflix content, and we will not do so.
- **Professional indemnity insurance.** [Insert insurer, limit of indemnity and policy year. In progress.]

15. Performance Measurement

We propose the following scorecard, reported monthly in the client dashboard and reviewed at each quarterly business review. The at-risk fee in Section 11.3 is released when at least four of the six KPIs are met in the quarter.

#	KPI	Target	How measured
1	Responsiveness	95% of requests acknowledged within 2 business hours; 90% of routine advice within 1 business day	Matter system timestamps
2	Budget accuracy	Final fees within 10% of the written estimate on 90% of matters	Estimate vs invoiced fees per matter
3	Accrual accuracy	Monthly accruals within 10% of actual invoices	Legal Tracker accrual vs invoice
4	Invoice quality	At least 95% of invoices accepted first time in Legal Tracker	Legal Tracker rejection data
5	Translation quality	Substantive error rate below 1% of segments; 95% of deliveries on time	QA log and delivery timestamps
6	Netflix satisfaction	Average score of at least 4.5 out of 5 from Netflix Matter Leads	Quarterly survey

We welcome Netflix's input on these measures and are happy to adopt Netflix's own performance framework in their place.

16. Onboarding and Transition Plan

Onboarding is at our cost. Netflix will not be charged for any of the activities below.

Timeframe	Activities
Award to day 10	Engagement letter incorporating the Guidelines and the Addendum; Legal Tracker profile and timekeeper rate submission with representation data; security point-of-contact confirmation; onboarding of the translation desk to Netflix tools and glossary; conflicts confirmation
Days 10–30	Kick-off with each Netflix Matter Lead; intake of Netflix templates, playbooks and precedents; agreement of matter budgets and AFA selections; dashboard configured and shared; first fortnightly stand-up
Days 30–60	First monthly invoices and accruals submitted; first horizon-scanning briefing; marketing playbook and contract playbooks tailored to Netflix; translation QA metrics baseline established
Days 60–90	First quarterly business review: KPI results, spend against budget, staffing review, lessons learned, and adjustments agreed with Netflix

17. Acceptance of RFP Terms and Closing Statement

Dentons KMN acknowledges and agrees to the Terms and Conditions set out in the RFP, including that: Netflix may reject any or all proposals or cancel or modify the RFP at any time; Netflix is not obliged to accept the lowest-priced proposal; Netflix is not liable for any expense we incur in preparing this response; the RFP grants no right to use the Netflix name, logo or content; we will return or destroy RFP materials on request; and Netflix's decisions are final and not subject to protest or appeal. All communications regarding this RFP will be directed only to legalops-ebilling@netflix.com.

We have prepared this proposal as we would advise Netflix: directly, practically and with a clear recommendation. We believe Dentons KMN offers Netflix the combination it is looking for, namely global reach through a single accountable team, product-focused advice delivered at Netflix's pace, a purpose-built legal translation desk, and pricing that is predictable and tied to performance. We would be delighted to discuss any aspect of this proposal during the interview period and look forward to the opportunity to work with Netflix.

Agbor Nkongho

Relationship Partner, Dentons KMN

Appendix A – Security Addendum Control Matrix

Mapping of Section 2(a)–(s) of the Netflix Outside Counsel Security Addendum to Dentons KMN controls. [The Security Point of Contact should verify each description against current firm practice before submission.]

Ref	Addendum requirement	Dentons KMN control	Status
a	Written policies, standards and procedures for secure processing of Netflix data	Information security policy suite reviewed annually; client-data handling standard applied to all Netflix matters	Compliant
b	Measures to identify and mitigate internal workforce risks	Background screening at hire, confidentiality undertakings, role-based access, joiner-mover-leaver process, insider-risk monitoring	Compliant
c	Logical or physical separation of Netflix data from firm and other-client data	Matter-centric document management with ethical walls; Netflix matters restricted to the named team	Compliant
d	Regular security reviews, assessments, testing or audits	Annual independent audit and penetration test; quarterly vulnerability scans; findings tracked to closure	Compliant
e	Perimeter protection and/or zero trust architecture	Next-generation firewalls, conditional-access and device-compliance policies, network segmentation	Compliant
f	Inventory of physical assets and remote device management	Central asset register; mobile device management with remote lock and wipe on every device that can access Netflix data	Compliant
g	Software and systems kept up to date; malware protection	Managed patching, endpoint detection and response, email and web filtering	Compliant
h	Timely patching of identified vulnerabilities	Critical patches within 7 days, high within 30 days, tracked through the vulnerability-management process	Compliant
i	Safe coding practices where applicable	Secure development standards applied to any in-house automation; third-party software assessed before use	Compliant
j	Change management for software and hardware	Formal change-control board with risk assessment and roll-back planning	Compliant
k	Log maintenance and monitoring	Centralised logging with 24x7 security monitoring and alerting on anomalies	Compliant
l	Secure access, transfer and storage using up-to-date encryption	TLS 1.2+ in transit, AES-256 at rest, encrypted client workspace for transfers; pseudonymisation where practicable	Compliant

Ref	Addendum requirement	Dentons KMN control	Status
m	No Netflix data on unencrypted removable storage	Removable media blocked by policy and by endpoint controls; exceptions require encryption and approval	Compliant
n	Least-privilege access	Access to Netflix matters limited to the named team and reviewed quarterly	Compliant
o	Multi-factor, passwordless/passkey or equivalent authentication	Multi-factor authentication enforced firm-wide; passkeys being rolled out; privileged access managed separately	Compliant
p	Detection and remediation of security incidents	Documented incident response plan, tested annually, with a 48-hour Netflix notification commitment	Compliant
q	Business continuity and disaster recovery	Documented and tested BC/DR plans with geographically separate backups and defined recovery objectives	Compliant
r	Workforce education and confidentiality obligations	Mandatory annual security and privacy training, phishing simulations, confidentiality obligations in every contract of employment and engagement	Compliant
s	Third parties and sub-processors held to equivalent measures	Vendor security due diligence and contractual flow-down of equivalent obligations; sub-processor list available to Netflix on request	Compliant
